**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15 – 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 6,298,058 to Maher et al.

Maher et al teaches groups attached to a multicast address which leave, followed by groups that rejoin, in col 10 lines 1 – 15. The examiner notes that although the devices are on different group addresses (and not on the same subnet as claimed), they are on the same global multicast group, wherein this is an obvious variation of being on the same subnet.

With regard to claim 17, note router 114, and that fast leave is an obvious variation of leave.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Blount whose telephone number is 703-305-0319. The examiner can normally be reached on M-F 9:00 - 5:30.
